TRAINING / Diploma

- License in **AUTOMATIC**.
  University: **USTHB**
  Sector: **ELECTRIC ENGINEERING**
  Department: **INSTRUMENTATION AND CONTROL**

- Training at **SAMSUNG** Electronics SMART City Campus 2 Gumi-South Korea.
  training on new Samsung equipment.

- Internship at **SONELGAZ** the HAMMA II power plant.
  Production of 209MW electrical energy by means of a gas turbo alternator. Installation, operation, command, control and protection of the turbo generator.

SKILLS

- Proficiency in programming languages**: Python, JavaScript, C++, Java, Assembler, Matlab.**
- Industrial automation**: GRAFCET, Ladder PLC, LabVIEW.**
- Programmable acquisition cards**: Arduino, Raspberry, PIC16F84.**
- Computer Networks**: IPv4, VOIP.**
- Knowledge of website creation**: HTML5, CSS, JAVASCRIPT, jQuery, React, Node.js, MongoDB, GraphQL, Git.**
- Android Development: **XML, Java.**
- Computer skills**: Office automation Microsoft Office.**
- Operating systems**: WINDOWS XP, Vista, 7, 8, 10, Linux Ubuntu.**
- Software**: Visual Studio, Android Studio, LabVIEW, TIA Portal (siemens), Proteus, Chrome.**

LANGUAGES

English: Well read and written
French: language of study
Arabic: Fairly well read and written
Japanese: Well read and written
Korean: read and written

Communication

My previous positions helped me develop my communication skills with colleagues, as well as teamwork.

Organization / Management

- I have gained a lot of self-confidence in terms of being responsible.
- Efficient and trained and equipped with the necessary resources to enable an effective manager, support and accompaniment of projects.

HOBBIES

- Passion for scientific articles and technical documentation, connected gadgets and the world of technology.
- Learning languages and programming languages.
